AI-000476

A grounding cable utilizing a BU-48B clip and a BU-27 clip on the other end

AI-000480

An industrial grounding cable. The flat nose has a dimple in the center to insure good electrical contact even when paint/powder covers the rest of the clip.

AI-000483-C

Heavy Duty Grounding Cable. Uses BU-124 Clips and 0 AWG Copper Rope.

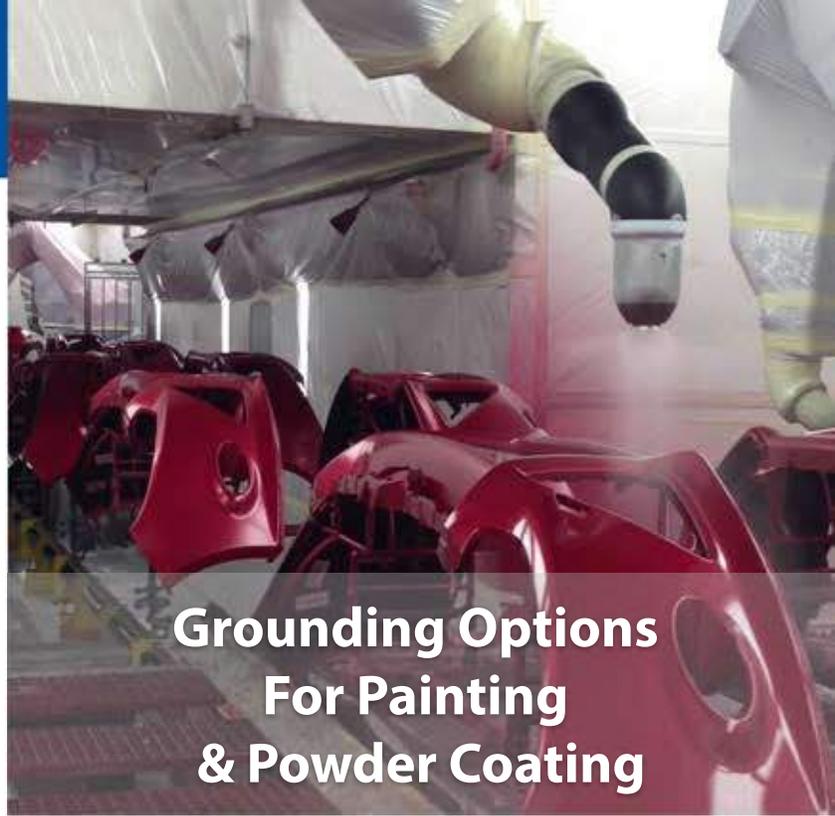

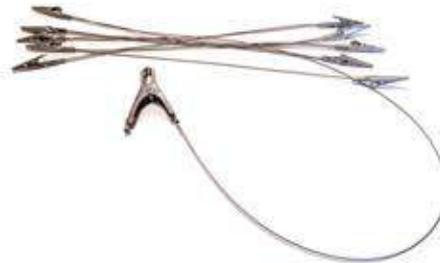

AI-000483

Heavy Duty Grounding Cable. Uses BU-120 Clips and 0 AWG Copper Rope.

AI-000485

Used to ground several components on one rack. Ten BU-60 alligator clips crimped on 10" intervals

Grounding Options For Painting & Powder Coating

Grounding Options For Painting & Powder Coating Plastic & Metal Substrates

AI-000422

Specifically designed as an industrial grounding cable for painting plastic components. It has smooth jaws on each clip to prevent damage and to allow rapid removal.

AI-000441

Specifically designed as an industrial grounding cable for painting plastic components. It has aggressive jaws on each clip which bite into both the target and the fixture for a consistent ground.

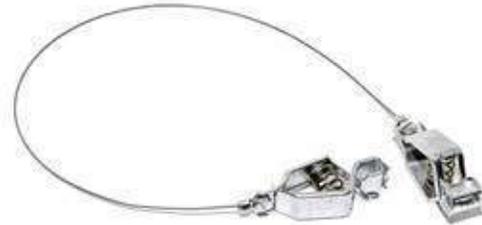

AI-000443

Ideally suited for grounding plastic components. It has an aggressive jaw on one clip for a rock solid fixture connection and a smooth jaw on the other clip to prevent damage to the part.

AI-000448

A heavy duty grounding cable for painting and coating applications. The large clips on this cable allow it to grab onto larger items compared to other grounding cables.

AI-000473

An industrial grounding cable for painting plastic components. It has smooth jaws on the clip to prevent damage and allow for easy removal.

AI-000475

A grounding cable utilizing BU-48B Clips on each end.

Just a Few Of Our Vast Selection Of Clip/Clamp Options:

BU-118
Flat Nose Painting/Plating Clamp

Designed as a holder for painting and plating applications. It has smooth jaws to prevent damage and is made from Stainless Steel for easy cleaning.

BU-48B
Automotive Analyzer Clip

Teeth mesh on three sides of the jaw for a good connection

BU-122
Dimpled Nose Painting Clip

Has a wide nose which acts like a shield to prevent paint from getting on the dimpled contact point. It also more clearance and a stronger spring than most painting clips

BU-60
Alligator Clip
Most common and versatile Alligator clip

BU-113XPN-LARGE
Large Clip

A holder for painting and plating applications. It has a light force spring to prevent damage. Not intended for electrical purposes.

BU-27
General Purpose Clip

A general Purpose clip that can be attached by crimp or screw connection. Also available in copper.

Mueller helps with:

- A comprehensive in-stock inventory of clips & cables to mix-and-match
- Sample units to test & validate on your process
- "Ready-to-Use" assemblies, delivered OEM direct or through your preferred supply chain partner
